What changed when I led

-30%

Team cycle time at Eventbrite, through better planning, ownership and engineering practices

+105%

Automated refund requests in five months, reducing customer support friction

50M+

Monthly impressions of promoted content, using KPIs and A/B testing

40 → 70+

Contributors in the Marketing Technology organisation I led at Sunweb Group

Where I've worked

Mar 2023 – Jul 2026

Engineering Manager

Eventbrite · Remote

Led a team of 8 engineers responsible for Eventbrite's advertising and post-purchase platforms, partnering with Product, Design and Data leadership to deliver customer-facing products at global scale.

- Grew the team from 4 to 8 engineers, leading hiring, onboarding, promotion planning and career development with 100% retention over two years.
- Reduced team cycle time by 30% through stronger planning, prioritisation, ownership and engineering practices.
- Introduced P0 end-to-end testing and a regression-prevention approach, reducing recurring defects by ~25%.
- Automated CI/CD workflows, strengthened service-health monitoring and alerting, and established testing strategies, ADRs and technical proposals.
- Drove AI adoption across my teams: Codex for bug fixing and test writing, knowledge-transfer sessions to make it a daily habit, a first-pass AI review on pull requests, and Claude and ChatGPT in my own day-to-day management work.
- Led post-purchase initiatives that increased automated refund requests by 105% within five months.
- Scaled advertising across web and native discovery surfaces with KPIs and A/B testing, reaching 50M+ monthly impressions.
- Expanded engineering onboarding to cover 90% of Spain's 100-person engineering organisation, and extended it to India as that site grew from 50 to 100 engineers.
- Orchestrated a global mentorship programme across the US, Spain and India with 100+ mentor-mentee pairs per edition.

Apr 2019 – Mar 2023

Head of Engineering

Sunweb Group · Girona

Led the Marketing Technology organisation through rapid growth, from ~40 to 70+ internal and external contributors across multiple engineering teams and product squads.

- Owned organisational strategy, workforce planning, hiring and budget for 50+ internal and 20+ external contributors.
- Redesigned a 50-person tech organisation: team domains, scopes, stakeholder ownership and Tech Lead roles, plus a dedicated Platform team.
- Built a career framework with skills, expectations and growth paths for the whole engineering organisation.

- Shaped a 3–5 year technology strategy, roadmap and OKRs covering platform engineering, automation, CI/CD and legacy modernisation.
- Led the engineering hiring strategy and 12 new hires, scaling the organisation by more than 75%.
- Drove people initiatives across 8 teams: calibration, engagement surveys, mentorship and team health checks.

Nov 2018 – Apr 2019

Solution Specific Knowledge Leader

everis (NTT DATA)

- Drove engineering standardisation (code review, version control, collaboration), increasing adoption of shared practices by ~30%.
- Led requirements and end-to-end delivery across 3 engineering teams as the primary client contact, from discovery to production.
- Delivered a major system migration and extended the platform to customer and supplier management.

Apr 2015 – Oct 2018

Backend Developer & Scrum Master

Sunweb Group

- Managed engineering delivery for a customer-facing product across a 10-person team, with Product and cross-functional stakeholders.
- As Scrum Master, increased feature delivery speed by ~30% and reduced customer-facing bugs by ~20%.
- Supported hiring and onboarding of 12 new engineers during a high-growth phase.

Apr 2011 – Apr 2015

Backend Developer

Aetech

Built and maintained MES and ERP systems and custom business applications in Delphi, SQL Server, VB.NET and C#.

Jul 2009 – Mar 2011

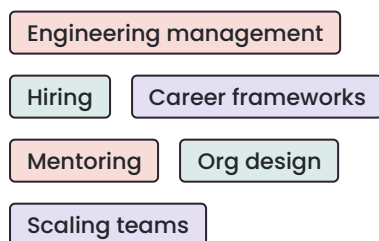

Backend Developer

Caixa de Girona

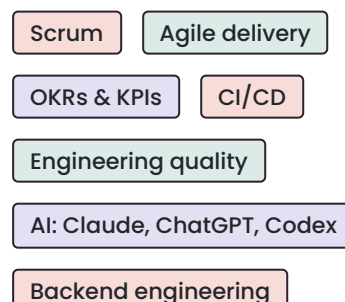

Developed banking systems and reporting solutions, and supported technology integration initiatives.
